

Far, Far Beyond . . . far

ALL technologies listed on these pages are guaranteed to meet or exceed the descriptions stated on these pages!

All Terrain Wheel Chair: This wheel chair will be capable of traveling over rugged terrain, mountain trails, thru wooded areas, and it will even climb stairs! Climb any stairs wide enough to accommodate the chair. The chair can easily be carried in a car trunk or van. Now, people utilizing wheel chairs can ride nearly all public transportation, have access to nearly every building and gain a great amount of freedom.

Projected annual sales - \$200,000,000

Tire Monitor System: This is a fully developed and tested system. Monitors the air pressure in automobile, truck, trailer and aircraft tires continuously. In vehicles like an 18-wheeler it can even signify which tire has lost 5 pounds of pressure or more. In a car it even measures the spare tire whenever the ignition switch is turned on. No more bad surprises when you need a spare. ALL for \$ 39.95! Beats the \$ 3,600 plus price on the Corvette system. This system has been tested in North Dakota winters and Arizona summers. Truck systems cost more.

Projected annual sales - \$ 9,000,000

"E" Turbine: This simple, low cost (one moving part) turbine is a highly improved and unique type of turbine. Has been tested to 300,000rpm! Eighteen pound model develops 110 hp. and runs at 60,000rpm. Extremely low maintenance, low noise and small size. Runs on many fuels and is non-polluting. Suitable for; cars, aircraft, boats, trucks, stationary power units, any application using internal combustion engines. Can be easily and inexpensively manufactured. 1/10th the cost of competing engines.

Projected annual sales - \$1,000,000,000+

High Speed, Low Cost Pill Counter: This simple to use pill counter will be as big as sliced bread for pharmacies. It will count 20 times faster than a person and more accurately. It can inventory large bottles, fill prescriptions and can be interfaced to existing computers. Just type in the number, pour in the bulk tablets and that number of tablets will be placed into the customer's bottle, all automatically. It has a small footprint, 6" square, and because of the low price several can be used by a single facility. This unit has been tested with every present pill, tablet and capsule. Projected retail price \$ 299.95

Projected annual sales - \$6,800,000

SPOOK: A whole new flying system that uses no wings, propellers, lighter than air devices, jets or any other existing lift system. Two design levels. From remote robots to 2 man, 4 man to 250 passenger commuter aircraft. Almost silent. Capable of landing and take-off from very small areas. Even from city centers, malls, sports facilities and events

Projected annual sales - \$25,000,000,000

Fluid Flow Systems: A series of low cost devices that steer the flow of rivers and streams. Protects bridges, dykes and river banks. Other devices restore salmon runs in streams by providing resting and nesting places. Devices protect eggs from

wash-out. † Could be utilized in company like Red Adair's oil well/field fire fighters. A company could go to hot spots and mitigate flood damage or prevent future damage in flood prone places.

Projected annual sales - \$ 21,000,000

Sonic/Light Deep Ray Skin Care System: This unique system (there is nothing remotely like it anywhere) will enhance any complexion from 15 to 100% faster than any present system or combination of skin products. It increases circulation and greater penetration of all skin products. Five different parameters individually controllable for maximum effectiveness with every skin care need.

Projected annual sales - \$ 7,000,000

Soil Enhancement Ag System: This new device performs three important functions and it will save farmers \$100,000,000 in fertilizers and pest control products. First, over 1,000 lbs of nitrogen (from the air) is injected into the soil each minute with special nitrogen fixing material (very low cost). At the same time any herbicide, fungicide or insecticide is also injected (if needed). However, only 2% of what is usually needed, as the chemical activity is greatly increased by the system. In addition, normally over 95% of the soil pests are killed by this unique system. A cost savings to farmers of 90+% on nitrogen fertilizer.

Projected annual sales - \$ 45,000,000+

Super Log Skidder: This is a fully developed and tested system. This very low cost skidder device has the ability to decrease the drag on skidded logs by 500%. Prevents hang ups and greatly lessens damage to forest floor. Simple to use with horses, pickup trucks, small tractors or best of all, the Extreme Machine 2000.

Projected annual sales - \$ 100,000

Ultimate Gold Concentrator: This new system will concentrate gold (from any source) to high concentrations. No leach piles needed! No chemicals and the water is reused hundreds of times. Crushed slurry, sand (with gold) or any other fine material is passed through this unit and all over burden is passed out, while gold (down to 5 microns) is concentrated in special chamber. Easy to use, can run 24 hours a day with little attention and low power requirements.

Projected annual sales - \$ 14,000,000

Hydro Exercise Gym: This unique design has no weights, springs, bungee, or similar devices. Smaller, lighter and lower cost than any present "Gym" type device. During a lift, if anything goes wrong, just pause (there will be NO resistance). After stopping go on and resistance continues. Far safer than any existing system! There can be resistance both up and down, in and out, in short, on any parameter. Resistance is instantly adjustable and over a wider range than ANY existing system. Over 300 different exercises possible from this simple system. Looks similar to several \$500+ units, costs a lot less!

Projected annual sales - \$ 7,200,000

Rescue Beacons: Designed for miners, mountain climbers and outdoorsmen, the locator beacons will broadcast from deep in mines, under an avalanche, from deep canyons, inside overturned vehicles, almost anywhere! Low cost transmitter under \$ 20. Locator receivers, simple and highly portable. Utilizes a whole new technology.

Projected annual sales - \$ 4,000,000+

Police/Fire Rescue Robot: Different from all present robots utilized in this type of work, this unit is fully hardened to withstand the direct hit by a .30 caliber weapon. The system is able to withstand up to 400 degrees for up to 30 minutes. It can climb stairs, go over debris, wreckage and rough terrain. It is capable of dragging a 280 pound person from a burning building. It has both day and night vision and very sensitive hearing. The police unit can be armed with Tasers, 9mm, .45 or 12 gage, all with video sighting.

Projected annual sales - \$ 12,000,000

Ultra Fine Rock Crusher: This is a fully developed and tested system. This entirely new system of crushing rocks is fast and highly efficient. It will crush down to -300 mesh in one pass, from any 8" rocks! Simple to manufacture, low maintenance costs and small in size. This is not a jaw, rod, cone or ball mill type crusher. **It uses entirely new technology.**

Crush coal to 300 mesh and it burns as clean as natural gas. Crush some rocks and it makes super mineral supplements for cattle, fowl and fish. Increased weight gains in all tests. The most powerful soil supplement ever measured in international tests. Rock dust has been tested for more than 16 years.

Projected annual sales - \$ 40,000,000

New Low Cost JET ENGINE: This engine has **NO moving parts.** It can be scaled to any size, from jet models to large combat aircraft. It can burn many different fuels and the performance is outstanding. This engine will cost about 6% of existing jet engines.

Projected annual sales - \$ 2,000,000,000+

New Electronic Fishing Lures: These new lures are the most effective lures ever manufactured! (Our old ones were voted "**The most effective lures in the world**" by the Outdoors Writers Association). Utilizing new technology, these simple to use lures have several unique abilities. They can change color thru the whole color spectrum while moving through the water. You no longer have to worry what color the fish are biting. Some put out signals only fish will respond to. Far beyond only sound. They also have mechanical attributes beyond any existing lure. All developed and tested in "Water Test Tunnel".

Projected annual sales - \$ 2,800,000

Enhanced Plasma Oil Well Drilling System: No drill pipe, no mud, no derrick, a whole lot simpler! This drill forms its own ceramic bore pipe as it cuts down through the earth (bore pipe is easily repairable if necessary), no drill pipe necessary. NOTHING to pull or push. Highly steerable, fast cutting and far safer than existing systems. This new technology will save money, time and lives. Initial calculations indicate this unit should be able to bore to much greater depths.

Projected annual sales - \$ 54,000,000

Ultimate "Unstuck": This is a fully developed and tested system. A compact device, carried in the trunk of a car, truck or SUV that allows a VW Beetle sized car to pull a fully loaded 2 ton truck out of deep mud. Already tested. Super simple and quick to use, low cost and big market. Units will sell for \$49.95 or less.

Projected annual sales - \$ 1,700,000

Ultimate Home Mill: This is a fully developed and tested system. Now anyone can cook with the freshest and most nutritious of ingredients. Mill the finest bread flour (minutes before baking, preserving the wheat germ), the finest cake flour in the world (far finer than found in any stores), rice, oats and other grains for outstanding breads and pastries. Super sauces and gravies. Make outstanding peanut butter, hazelnut, pecan, cashew and other nut butters. Fresh! The only mill that can process every type of food product. This could launch several new kinds of businesses.

Projected annual sales - \$20,000,000

Non-Lethal Person Immobilizer: This is a fully developed and tested system. With a range of over 300 feet, this unit will put down a person without any permanent injury for up to 20 minutes! Riot control, fleeing felons, and others. Simple to use as present side arms. Also great for immobilizing wildlife; bears, wolves, mountain lions and almost any other larger creature. No permanent damage or side effects. Under \$380 and ammo about \$81.00 per shot. Often ammo can be reused after recharging.

Projected annual sales - \$ 50,000,000

Maximum Range Golf Driver: Using no moving parts this golf driver will increase the energy at the point of impact between ball and club up to 200%. Same weight as existing clubs. This enhancement will add about \$70 to the cost of a driver.

Projected annual sales - \$ 7,000,000

Electronic Anti-Venom Unit: This is a fully developed and tested system. This small handheld device, when properly utilized, will fully counteract (neutralize the proteins) snake venom. It will also give quick pain relief. It will work for bee stings (even Killer Bees), scorpion stings, ant bites (even Fire Ants) and other insect bites and stings. Fully tested in S.E. Asia and S. America as well as U.S. . Low cost, simple to use and highly effective on wide spectrum of uses. This unit could save YOUR life! Projected retail price \$ 39.95

Projected annual sales - \$ 46,000,000

Ultimate Video Surveillance Projectile System: This is the "World's 1st" video projectile. In hostage, stand-offs and barricaded situations this complete video system (picture and sound) can be fired from a standard "Law Enforcement" grenade launcher through windows, doors or thin walls. Once inside, it will broadcast a high resolution view of room (full 360 degrees) and any sound within the room! Video range 1,000+ feet. Will transmit for 6 hours.

Two models; color and true night vision. Often it can be reloaded and fired again.

Projected annual sales \$ 3,000,000

Ultimate TV Commercial Killer: With the push of a button change from obtrusive TV commercials to beautiful scenes with natural sounds. Several categories to choose from; scenics, flowers, underwater, marine scenes, travel . . . Three different models.

Projected annual sales - \$ 30,000,000

Deep Robot: Simple to use, low cost robot with cameras, capable of 10,000 foot depths. With proprietary lighting for world class video and unique photography. Like none other. Now even high schools and very small colleges can explore the sea and make new discoveries that heretofore only large possible at international research centers. Far lower cost than any existing system and easy to use even from small boats.

Projected annual sales- \$2,000,000

Cruise Ship Video Deep Sea Robot: A great new addition to any cruise ship. Now passengers on any cruise ship can sit in comfortable surroundings and watch on three large screens, the sea under or off to the side of the ship, just like they were right there. Much like actually flying over the reefs, seeing the incredible sea life, with 200 degrees wide vision. Easy to launch and recover with low maintenance and cost. Can even be used by a ship off-shore to broadcast tremendous scenes to resorts or hotels on shore.

Projected annual sales - \$20,000,000

Salt Water Underwater Metal Detector: All present, conventional metal detectors do not work in deep salt water. The conductivity of sea water and several other problems prevent their effective working. Now a new technology gives fast, accurate detection and identification of metals and minerals in the sea down to 10,000 feet Gold, silver, platinum, iron, and hundreds of other metals and minerals.

CONFIDENTIAL

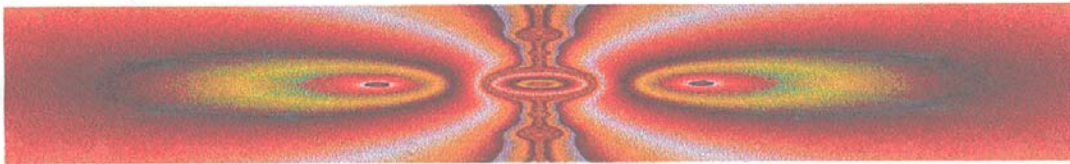

SPOOK TECHNOLOGIES

This is a confidential briefing of some new "Here-To-Fore" totally unknown technology.

This technology will introduce a totally new system for flight! **No wings, no propellers, no jets, not lighter than air**, in fact no known system! The "SPOOK" system provides for an astounding 6-axis control system with greater stability than any existing method of flight. It's highly efficient, with one version being almost silent. All of these features at far lower cost than other present systems. It takes off and lands vertically, able to thread its way through a forest, down the halls of a building, soar up a building 200 stories only two feet from the windows . . . and much more!

The following is only an introduction of the smaller version, Spook Robots, but the technology can be used in many other areas.

Its scaleable to any size, from a 5 lb. Carbon/kevlar reconnaissance robot to passenger aircraft capable of hauling 200+ people.

Far, Far Beyond . . . far

ALL technologies listed on these pages are guaranteed to meet or exceed the descriptions stated on these pages!

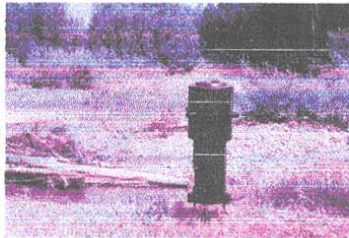

CONFIDENTIAL

LONG RANGE HIGH SPEED SPOOK

This unit is capable of flight up to 10 miles, with a duration of about one half an hour, one charge.

In a situation such as the Columbine High School tragedy the SPOOK could have been sent into the high school, without putting any life in jeopardy, and knowing immediately who was there, what they were doing, with what, how, and where. In short, it would be better than having a person right there! The SPOOK can move faster, see in total darkness, and disperse multiple remote listening devices. It can provide a **full 3-D color image with full stereo sound**, to control personnel outside or **to headquarters many miles away**. It can also be configured to incapacitate the person(s) that are threatening or doing harm to others.

It can be used inside and outside house standoffs, inside warehouses, caves, mines, hospitals, in the pursuit of suspects (through neighborhoods, woods, all rugged terrain, industrial complexes, and hundreds of other situations).

SPOOK before lift-off.

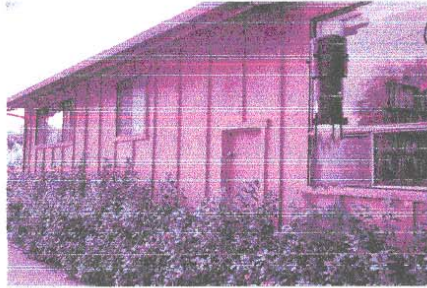

SPOOK hovering.

SPOOK moves up and down, right and left, forward and back and rotates right or left about its own axis. It is rock steady hovering in the air and can be controlled easily by a first time user. This low cost unit and support equipment can be carried in the trunk of a mid-sized car and set up in a few minutes.

A smaller sized unit is almost silent and suitable for most indoor situations.

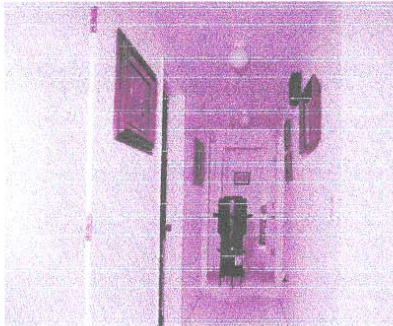

CONFIDENTIAL

SPOOK looking in window. * See 3-D, POV.

SPOOK moving through woods and across stream.

SPOOK traveling down hall, 10" off floor.
* See 3-D, POV

SPOOK dropping one of 3 remote wireless listening microphones.

Operator flying **SPOOK** with 3-D glasses. Equivalent to 80" screen!

System can be flown using laptop computer rather than 3-D glasses.

ELECTRONIC ANTI-VENOM UNIT

DESCRIPTION: This small, handheld device (a little larger than a pack of cigarettes), when properly applied to the area of the bite, will neutralize the proteins of the snake venom. Further, fairly rapid relief of the pain is an added benefit.

This unit is fully adjustable in frequency and power output to provide optimum results on all different types of bites, stings and nearly all venoms. This design is based upon the pioneering work done by Dr. Ronald Guderian in extensive research in anti-venom treatment of snake bites utilizing high voltage electricity.

This unit is successful in treating snake bites, scorpion stings, bee stings (including Killer Bees), ant bites (including fire ants) and other insect bites and stings.

UNIQUE ASPECTS:

- Highly effective
- Can save lives
- Relieves pain
- No known side effects
- Rapid results
- Small, lightweight and easily carried in field
- Low cost

HOW IT WILL BE DEVELOPED: **Completed**

PROJECTED SELLING PRICE: \$ 49.95

PROJECTED MANUFACTURING COST: \$ 20.00

MANUFACTURING FACILITIES NEEDED: Plastic molding capabilities and electronic assembly and testing.

STAFF NEEDED: Can be all jobbed out. Molder and electronic assemblers.

MARKETING: Customers

- Outdoorsmen
- EMT Units
- Missionaries
- Workers in areas where exposure is high

Rural Doctors

Military Medical Units

Law Enforcement

and many more.

ESTIMATED ANNUAL SALES: \$ 46,000,000 +

HOW IT WILL BE MARKETED: Trade shows

Outdoor publications

TV (Pis)

Internet (w/ video)

WHY WILL THEY BUY THIS PRODUCT: Highly effective

Wide spectrum of use

Small and light weight

Simple to use

Low cost (doesn't need specific anti- venoms)

COMPETITION: Present drug systems. None of this type

ULTIMATE HYDRAULIC BICYCLE

DESCRIPTION: Visualize a bicycle with no chain gears or sprockets. It is capable of going over 100 mph (behind a wind brake) or climb a 100% grade! It has an infinite gear ratio, shifts automatically to the best ratio and features full hydraulic braking. With nothing to wear out in the brake.

It will cost no more than the parts it replaces on a conventional 10 speed bike. Simple to ride; you just dial in your preference on a dial on the crank unit; 7 for most men, 5 for many women and 3 for many children. As the bike encounters a hill it automatically shifts down (just the right amount) and you continue peddling at the very same speed. Once you reach the top of the hill it readjusts the ratio (actually it does this once a second . . . automatically). Most people riding bikes don't know which gear they should be in. Now it won't matter!

In fact it can be retrofitted on to any bike, even single speed ones. For marketing reasons a whole new line should be introduced at first. (with a good price)

UNIQUE ASPECTS:

- Super low cost
- Simple to use
- Simple to manufacture
- Zero maintenance

PROJECTED SELLING PRICE: From \$ 40 for a retrofit package to \$ 500 for new bike

PROJECTED MANUFACTURING COST: About 1/3rd the selling price on retrofit package

MANUFACTURING FACILITIES NEEDED: Injection molding capabilities and CNC machining capabilities

STAFF NEEDED: Molders and assemblers

MARKETING:

- Own line of bicycles
- World wide bicycle manufactures
- Retrofit packages Bike shops, worldwide

ESTIMATED ANNUAL SALES: **\$150,000,000 +**

HOW WILL IT BE MARKETED: (Pis) TV
Magazines

WHY WILL THEY BUY THIS PRODUCT: New
Simple to use
Reasonable price
Can fit any bicycle

COMPETITION: **None at this level**

Design	Market research	Available now	Status	additional investment needed *** see attached sheet	Has this been disclosed to corporations	Patent situation ** see attached sheet
Electric Jet Drive (boats)	Yes, over 20,000 units	Mock up & housing complete		\$4,000 for demo	NO	
Fire Extinguisher/Preventing sys.	Prelim. Over	Conceptual drawings, description		\$12,000 for demo	NO	
Tire Monitor System	Lg & WW	30+ prototypes available, everything	Tested extensively	Ready (new inf. Mold)	NO	** see attached sheet
Anti-Venom unit	over 500,000	Demo prototype, schematics, mat. List	Tested extensively	\$900 for display/demo unit	NO	
Log Skidder	limited, but 1,000s	Demo prototype	Tested & used	\$300 for display/demo unit	NO	
Un-Stuck	over 600,000	Demo prototype	Tested	\$200 for display/demo unit	NO	
Immobilizer	300,000+	? Full description	Tested	\$3,000 for display/demo unit	NO	
Ultimate Kitchen Mill	limited 120,000	Picture, drawings, mat. List, +	Tested & Used	\$700 for display/demo unit	NO	
Ultra Sonic/Light Skin Care	over 1,000,000	Conceptual drawings, description	Part tested	\$5,000 for display/demo unit	NO	
Electronic Fishing Lures	700,000	Conceptual drawings, description, models	Tested extensively	\$14,000	NO	
Kitchen - Ultra Oven	limited 3,000	Conceptual drawings, description	Tested	\$7,500	NO	
Kitchen - Cryogenics	limited 1,000 approx.	Process description		\$4,500	NO	
Air Filter, Heavy Industrial	Large in \$ \$800,000+	CAD drawings, disipation	EPA test 100%	Full \$85,000/ \$4,000 lab	NO	
E-Jet, no moving parts	Large \$1 billion +	Conceptual drawings, description		\$ 1,000 demo	NO	
E-Turbine, one moving part	Extremely large \$ 2B	Conceptual drawings, description	Mini. Test	\$27,000 for demo	NO	
Underwater Cruise Ship Video	Limited 100 units	Conceptual drawings, description	Partial test	\$11,000	NO	
Deep Probe, UW Robot	limited 40 units	Conceptual drawings, description	Part tested	\$ 4,700 demo + boat rent	NO	
Soil Enhancement System	? ? 2,000 units	Patent Application	Comp. Tested		NO	
Mines/Explosives Detection	??	Schematics, test data	Tested		NO	ready to file
Kitchen - Induction Fryer	10,000 units	Conceptual drawings, description	Tested	\$2,300	NO	
High Speed Pill Counter	? 4,000	Conceptual drawings, description, pictures	Tested	\$3,500	NO	
Electronic Fish Attractor	800,000 + units	Conceptual drawings, description	Tested	\$2,000 + boat rentals (\$) 1	NO	
Golf Driver	? 2,000	Conceptual drawings, description		\$3,000	NO	
Spook, whole new flying system	Multi Billions	Conceptual drawings, description, pictures	Prelim test	\$130,000	NO	
Gold Concentrator, no chem.	\$14,000,000	Conceptual drawings, description		\$5,000	NO	
Police/Fire Robot	\$45,000,000	Conceptual drawings, description		\$180,000	NO	
Military Robot	\$65,000,000	Conceptual drawings, description		260,000	NO	
Super Sniper Weapon	???	Components, test data, description	Fully tested	\$6,000	NO	
Video Projectile	\$3,000,000	Conceptual drawings, description, comp		\$4,500 demo/video	NO	
Saltwater Deep Metal Det.	? Service or \$ 45M	Conceptual drawings, description	Some tests	\$11,000 + boat rental	NO	
Fluid Flow	? WW service \$10M	Conceptual drawings, description	Lab tested	\$3,700 demo	NO	
Rescue Beacon	70,000 units	Schematics, description		\$5,500 demo	NO	
Plasma Oil Well Drill,	\$54,000,000	Conceptual drawings, description		\$325,000 small demo	NO	
New Hydraulic Bicycle	6,000,00 units	Conceptual drawings, description	old tests	\$21,000 demo	NO	
E Hydraulic Fishing reel	\$20,000	Conceptual drawings, description		\$3,000	NO	
Simple/Low Cost Water Filter	\$40,000,000	Conceptual drawings, description, video	Test EPA 100 %	\$4,000	NO	
Simple Vortex Well Drill	\$8,000,000	Conceptual drawings, description		\$2,900	NO	
Ultimate Rubber Tire Shredder	\$22,000,000	Conceptual drawings, description		\$35,000	NO	
Electronic Tooth Deesentizer	\$270,000	Conceptual drawings, description	Tested	\$1,400	NO	
Ship Stabilizer	\$225,000	Conceptual drawings, description	Tested	\$700	NO	
World's Greatest Story Tellers	\$800,000	Conceptual drawings, description		\$450	NO	
2 System to Eliminate Car Chases	\$500,000	Conceptual drawings, description		\$17,000	NO	
Tilt-Up Concrete system	\$120,000	Conceptual drawings, description	Tested	\$700	NO	
Vortex Heater/Air Conditioner	\$40,000,000	Conceptual drawings, description	Tested	\$1,10	NO
